Bennett Land Surveying Ltd. is a mid-sized legal, engineering and topographic survey firm of B.C. Land Surveyors. Our offices are located in North Vancouver and Surrey. Together with our predecessor firm, we have been active in British Columbia for over 40 years.

In southwest B.C. we are particularly active in the Lower Mainland, the Sea-to-Sky corridor and Bowen Island. Our projects range from surveys of individual lots for home owners to some of the most complex residential and industrial/commercial projects.

We are currently seeking a detail oriented **CAD Technician** with over 2 years of experience to join our team! The CAD Technician plays an integral part in the Bennett Land Surveying team by interpreting accurate data from our field crews and creating a variety of high quality survey plans.

**Responsibilities and Duties:**
- Develop and prepare survey drawings and designs using AutoCad for a variety of survey plans including construction layout, topographic, and legal survey plans
- Coordinate legal plans and land titles
- Complete calculations and survey computations involving GPS and data processing

**Qualifications:**
- Minimum of 2+ years of AutoCad Civil 3D experience
- Post-secondary educations in Geomatics or CAD diploma is strongly preferred
- Able to perform survey calculations and familiar with GPS systems
- Excellent computer skills with an ability to learn new software programs
- Demonstrated understanding of basic surveying principles and survey plan requirements

**Benefits:**
Bennett Land Surveying is a progressive and leading surveying company that offers excellent training and mentoring, medical/dental package, RRSP contribution, a wellness fund after probationary period, and competitive compensation.

**Applying:**
